Fund Description

The iShares MSCI Israel Capped Investable Market Index Fund seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI Israel Capped Investable Market Index ("the Index").

Index Description

The Index seeks to measure the performance of the Israeli equity market. It is a modified capitalization-weighted index that aims to capture 99% of the (publicly available) total market capitalization. Component companies are adjusted for available float and must meet objective criteria for inclusion to the Index, taking into consideration unavailable strategic shareholdings and limitations to foreign ownership. The Index takes the MSCI Israel Investable Market Index and caps all component companies' weights at 24%. MSCI reviews their indexes quarterly.

Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. Market returns are based upon the midpoint of the bid/ask spread at 4:00 PM Eastern time (when NAV is normally determined for most iShares Funds), and do not represent the returns you would receive if you traded shares at other times.

Performance information for the Index assumes reinvestment of all income and excludes management fees, transaction costs and expenses. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.
